Subject: Contract 705, Task Order 3

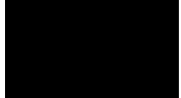

Gentlemen:

The Variable Magnification Tracing Projector delivered under the subject contract is currently undergoing evaluation testing. Your technical representatives have indicated, satisfaction with the instrument particularly with the resultant solution to the illumination problem.

A final tabulation of actual expenditures versus contract funds is as follows:

	<u>CONTRACT FUNDS</u>	<u>ACTUAL EXPENDITURES</u>
Engineering Material		25X1A
Engineering Labor		
Engineering Overhead		
Manufacturing Material		
Manufacturing Labor		
Manufacturing Overhead		
Subcontract		
General Research		
G&A		
Fee		
TOTAL		

In an effort to complete the contract without additional delay and since it is difficult to forecast total expenditures at the very end of a contract, additional funding was not requested at the time accumulated expenditures reached allocated funds. Since the total cost is now known we are able to submit a realistic request.

Actual expenditures		25X1A
Contract Funds		
Overrun
